Trich =Trichostrongylus (black scour worm). Ost = Ostertagia (brown stomach worm). Chab = Chabertia (large mouthed bowel worm) Oes = Oesophagostomum (nodule worm). Nematodirus (thin necked intestinal worm). Monezia (tape worm). BP = Haemonchus (Barbers Pole worm)** Cannot differentiate BP eggs using this test. Further testing needed to confirm BP

***AFEC-Adjusted Faecal Egg Count Eggs per Gram. Moisture content of the faeces will influence the number of eggs per gram.**
Samples are assessed for average moisture content and the count is multiplied by moisture score to increase accuracy of results
